

I am requesting that you reject NAB petition 04-160, which seeks to limit the ability of satellite radio to air local traffic and weather reports. I do not believe the FCC should be involved in what is basically an issue between competitive businesses trying to gain more or lose fewer customers and I pay for this service and I want access to this information. I would also like to say that I am appalled by Michael Powell's current campaign to abrogate the rights of United States citizens' freedom of speech and right to choose what they want to see and hear on radio and television. The FCC is overstepping their authority in doing this. You are a federal agency only, not elected by the people. Thank you for your time
